

# Microsoft Office 2007 A New Interface!

Mario Chiasson, Technology Mentor

# Session Outline

# CR<sup>2</sup>S=S

## **Create**

**Create a desire to learn. We learn faster when we want to learn something, when we are motivated to learn. Teachers can have a great impact on students' involvement in class by creating a team spirit. Being enthusiastic and friendly creates an environment that inspires and stimulates students in their learning.**

## **Respect**

**Respect each student's ability to learn in different ways. Students learn several different ways using their five senses.**

## **Respect**

**Respect each student's ability to learn at different speeds. It's like a sport! To build confidence, students have to understand the skill, take the necessary time to review and practice the skill, and as a result the skill will be integrated automatically in their lives.**

## **Simple**

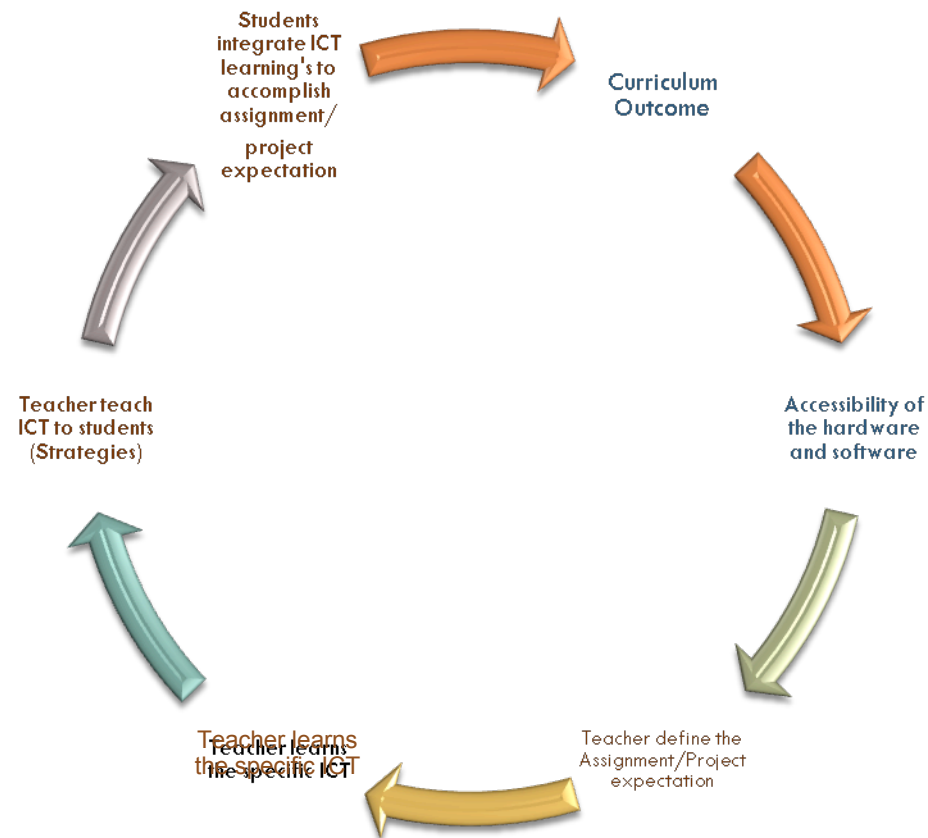

**Simple! The simpler the better! Keep your strategies of teaching straightforward.**

## **Success**

**Success! This formula will encourage the sharing of knowledge and build confidence in the students allowing them to achieve every challenge presented to them.**

# Process of integrate ICT in a lesson plan

(Chiasson, 2004)

# Activity...

## **Create a PowerPoint on class rules**

- **Classroom rules**
- **Hall rules**
- **Lunchtime rules**
- **Our promises**
- **Our agreement**
